2.1.1. Filter options	
2.1.2. Side-menu Navigation	
2.2. Navigating through CAS Dashboard page	

## 1. ICDS-CAS Mobile Dashboard

The ICDS-CAS Mobile Dashboard has been developed for users at the National, State, District and Block level to facilitate easy access to reports on the web dashboard via mobile application. The purpose of it includes:

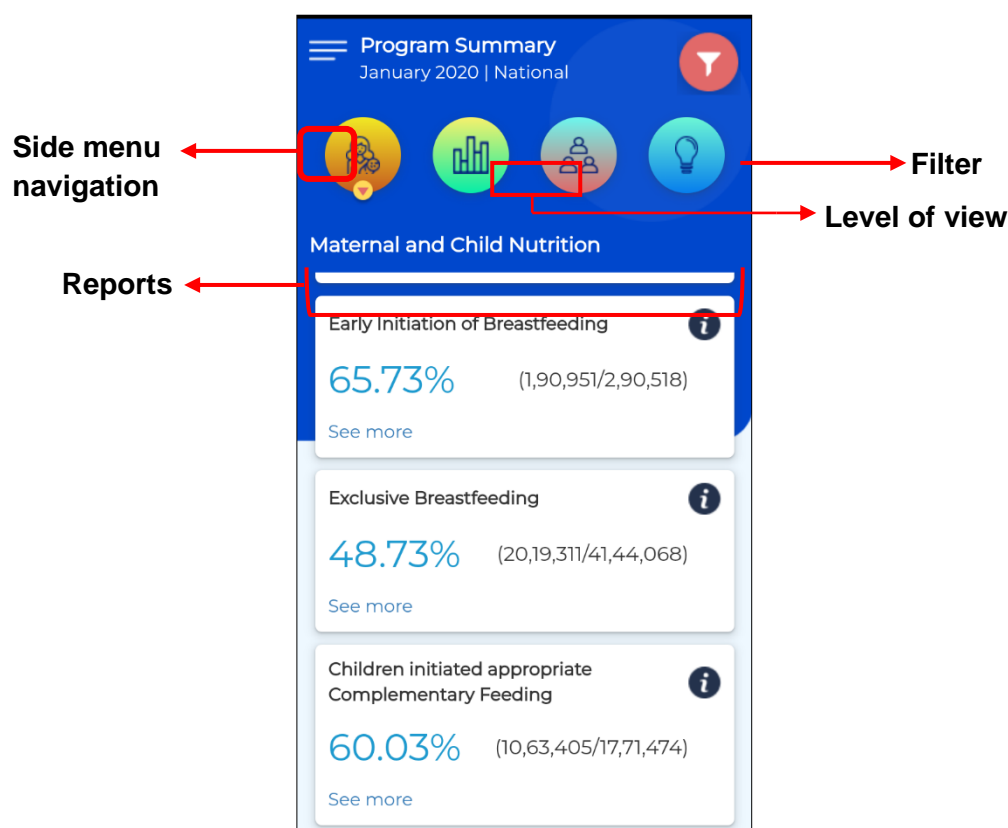

1. Monitoring and evaluating ICDS indicators in order to view progress and identify problem areas
2. Supervising the functioning of the ICDS program

**Note:** CAS Mobile Dashboard will include data and reports from the web dashboard only. Reports that require Excel download will not be included for mobile use since they are best viewed and analyzed on desktop.

## 2. Navigating the ICDS-CAS Mobile Dashboard

Program Summary will be the default landing page of the mobile dashboard. Each page of the dashboard displays data based on the administrative level of the user who logs in.

On the Program Summary, a National level user will view data for the entire country and can drill down to lower administrative levels (State/District/Block/Sector). A State level user can view data for the entire State and can drill down to lower levels (District/Block/Sector/AW

C), a District level user can view data for his/her District and can drill down to lower levels (Block/Sector), a Block level user can view data for his/her Block and can drill down to lower levels (Sector)

## 2.1. Elements of ICDS CAS Mobile Dashboard

### 2.1.1. Filter options

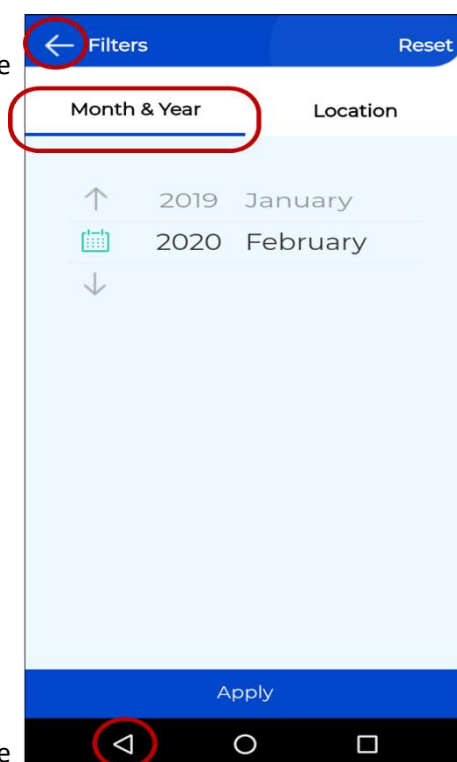

The mobile dashboard, much like the web dashboard, offers filtering option to the users. The user should click on the filter icon, located at top right corner of the corner. The data can be filtered on two levels,

#### Month & Year Filters-

The Month & Year filter option enables the user to filter data based on month and year

Tap on this arrow to go back from the filter page

Tap on this arrow to go back from the filter page

- The blue bar below location means that the Month & Year filter is active
- Scroll up/down the Year and the month filter options to choose the month, year you want to view the data for
- After the filter is chosen, tap on “Apply” at the bottom of the screen to activate the month and year filter

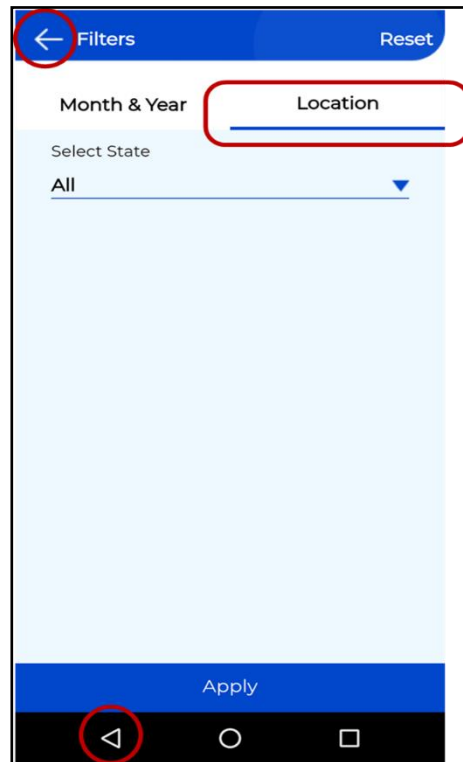

- Use the back arrow at the top left corner or the back button on the screen to go back of the filter page

### Location Filter –

The location filter option enables the user to filter data based on the location, different levels of location

Tap on this arrow to go back from the filter page

Tap on this arrow to go back from the filter page

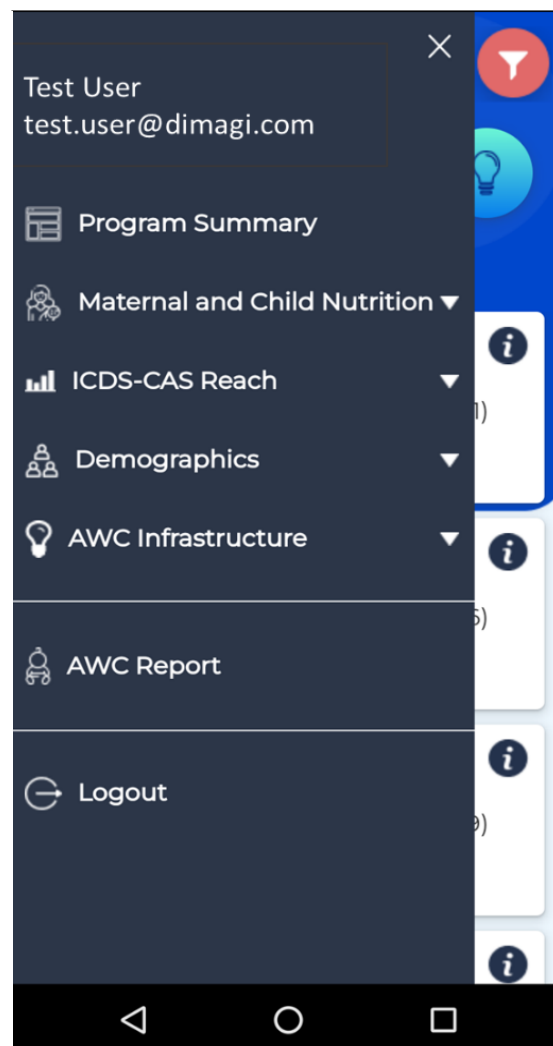

- The blue bar below location means that the location filter is active
- Click on the blue drop down arrow to choose the location (state/ district/ block/ sector/ AWC) from the options
- The data can be filtered till AWC level. However, on choosing a particular AWC the user is re-directed to AWC Report
- After the filter is chosen, tap on “Apply” at the bottom of the screen to activate the location filter

### 2.1.2. Side-menu Navigation

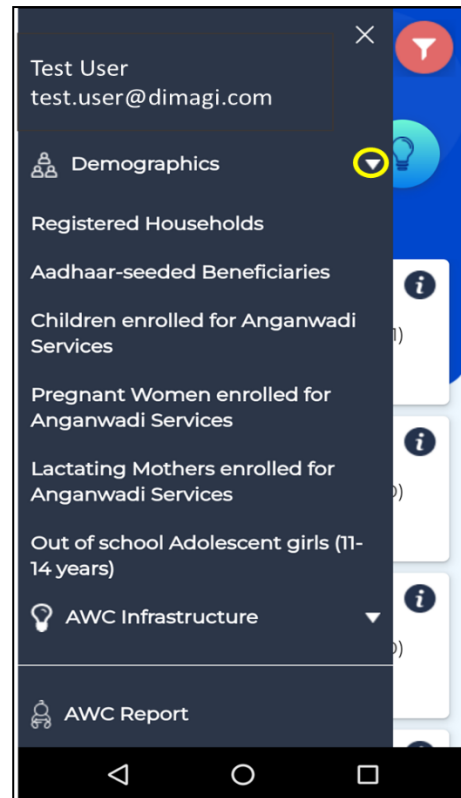

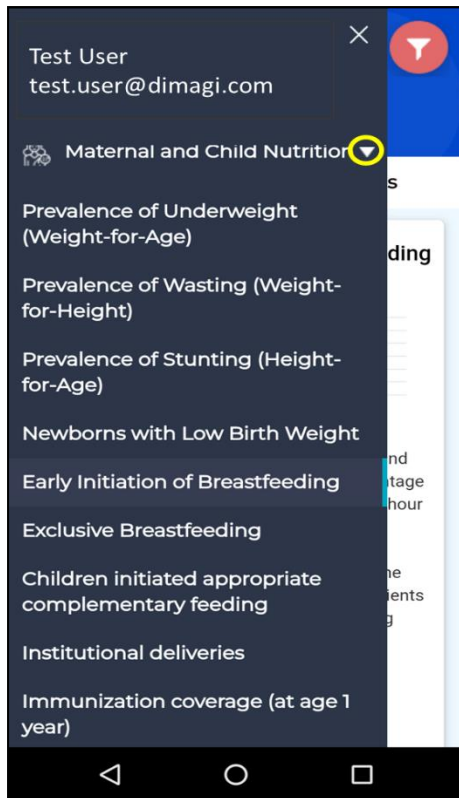

To access the side-menu navigation option tap on at the top left corner of the screen. This will expand the navigation options:

1. **User name and login-id:** It shows what user id you are logged in from
2. **Program Summary:** The user can navigate to the program summary of the mobile dashboard by clicking on the this. It has four components:
  - a. **Maternal and Child Nutrition:** The user can navigate to maternal and child nutrition page of the program summary by clicking on this. This area of the mobile dashboard shows indicators related to nutrition status of the mother and child
  - b. **ICDS-CAS Reach:** The user can navigate to ICDS CAS Reach page of the program summary by tapping on this. This area shows indicators related to reach of the ICDS CAS program
  - c. **Demographics:** To navigate to demographics page of the dashboard, tap on this. It shows demographics indicators
  - d. **AWC Infrastructure:** To navigate to AWC Infrastructure page of the program summary, tap on this. This area of the mobile dashboard shows indicators around infrastructure of the AWCs
3. **AWC Report:** This report provides detailed information on various indicators about an individual Anganwadi centre (AWC). The user can tap on “AWC Report” on the side menu navigation to view AWC level data
4. **Logout-** The user can log out of the mobile dashboard by clicking on “Logout” on the side-menu navigation

*Side-menu navigation can be used to navigate to a particular area of the mobile dashboard when you're on a different page. For e.g., if the user is on Maternal and Child Nutrition area of the program summary, he/she can directly navigate to AWC Report by clicking on it on the side-menu navigation*

Click on the drop-down arrow adjacent to the indicator area names on the side-menu navigation pane, (i) Maternal and Child Nutrition, (ii) ICDS CAS Reach, (iii) Demographics, (iv) AWC Infrastructure, to get a list of indicators under that area. Clicking on the indicator name to directly get to the map/chart view or rankings of different locations for that indicator.

To close the list, again click on the drop-down arrow and it will fold the list showing only the indicator area name.

Similarly, you can do it for other indicator areas.

## Program Summary

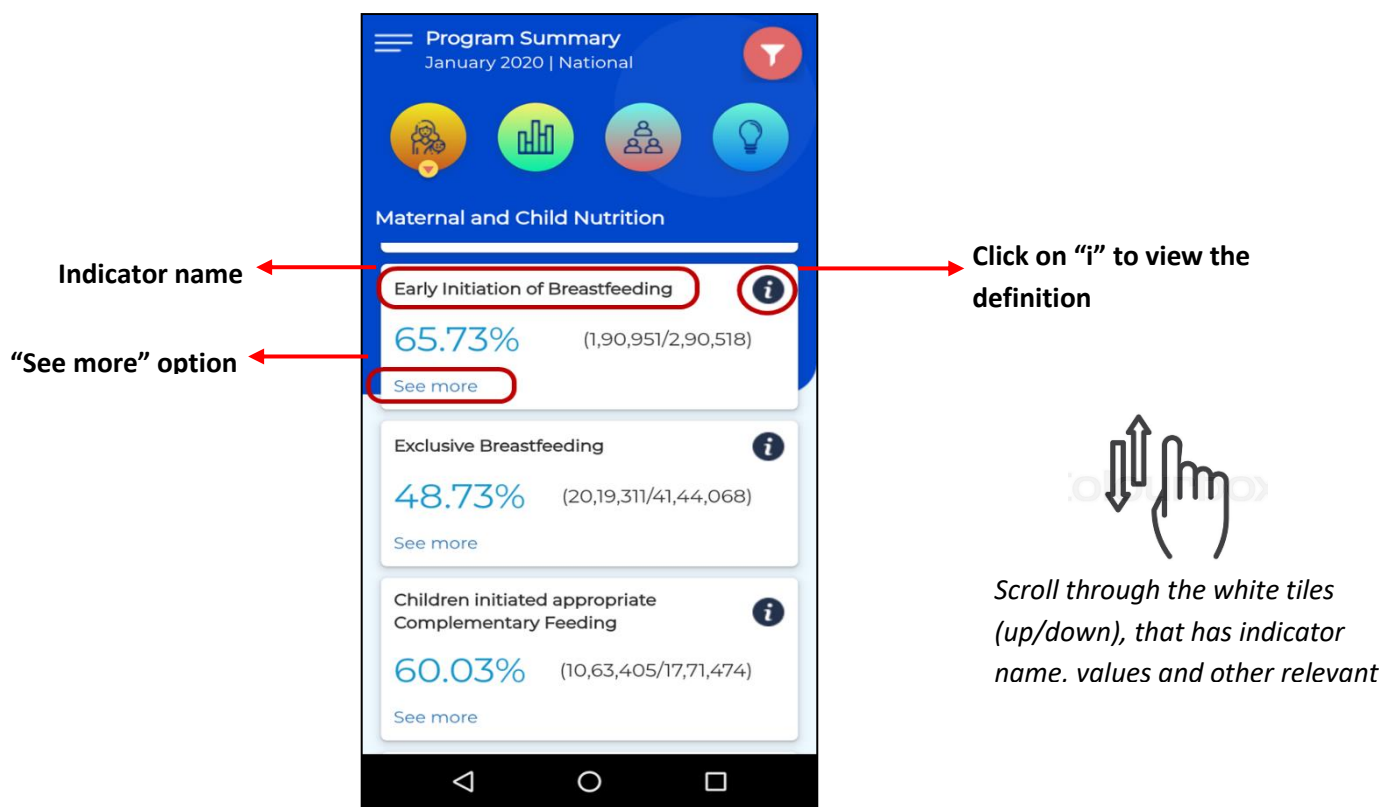

The four reports of ICDS CAS program summary are as follows:

	<b>Maternal and Child Nutrition -</b> The Maternal and Child Nutrition area of the Program Summary includes indicators that provide information about mother and child health at a particular location for a month
	<b>ICDS CAS Reach -</b> The ICDS CAS Reach area of the Program Summary includes indicators that provide information about extent of coverage of ICDS CAS application for a month
	<b>Demographics -</b> The Demographics area of the Program Summary includes indicators that provide information about the number of beneficiaries covered under ICDS CAS across various categories
	<b>AWC Infrastructure -</b> The AWC Infrastructure area of the Program Summary includes indicators that provide information about infrastructure facilities available at the Anganwadi centres (AWCs)

## 2.2. Navigating through CAS Dashboard page

After logging-in on the ICDS CAS mobile dashboard the default landing page is the program summary page. The user needs to select desirable filter options and the area of data to view indicators. Every area of the program summary has multiple tiles one below the area. The user can scroll through (up/down) the tiles to view different indicators. The users can see data till the Anganwadi Center level.

Maternal and Child Nutrition page of the Program Summary

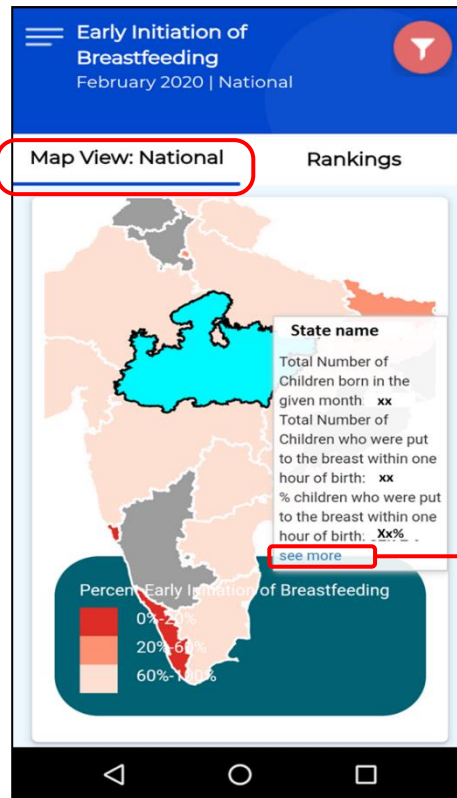

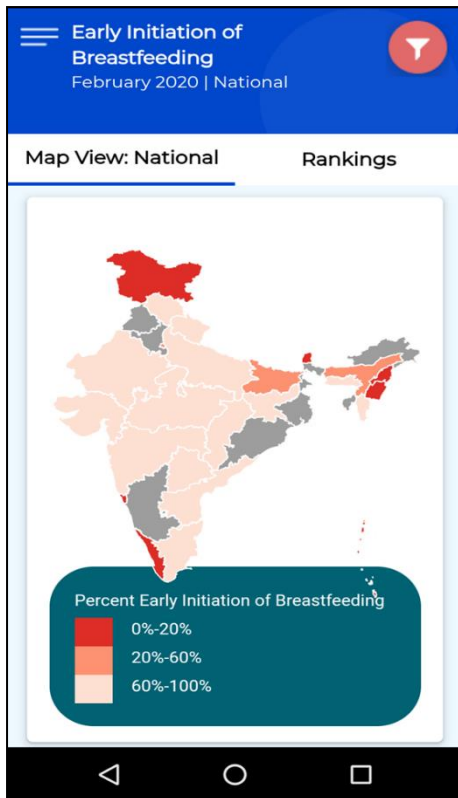

#### Some features of Program Summary page:

- **The "i" text:** Clicking/hovering on the "i" text of an indicator will display the definition of that indicator along with other relevant information about that indicator
- **"See more" option:** To know more about an indicator or to get a map/chart view and ranking of a particular location (state/district/block/sector) on that indicator click on "see more". After clicking on "see more" the user is default landing page is the map view.
  - To identify which section is active, look for blue bar below the section name. If the blue bar is below "Map view" then it indicates that the map view is active.
  - Map view is available at national and state level. District, block and sector level data is displayed in bar charts

Click on a particular location boundary on the map will open a small box with indicator details and a "see more" option and an index box at the bottom explaining colors pertaining to a particular coverage area range

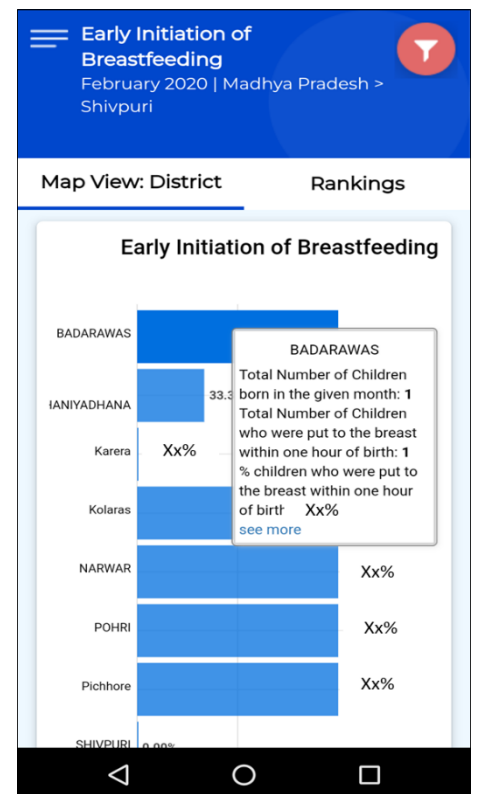

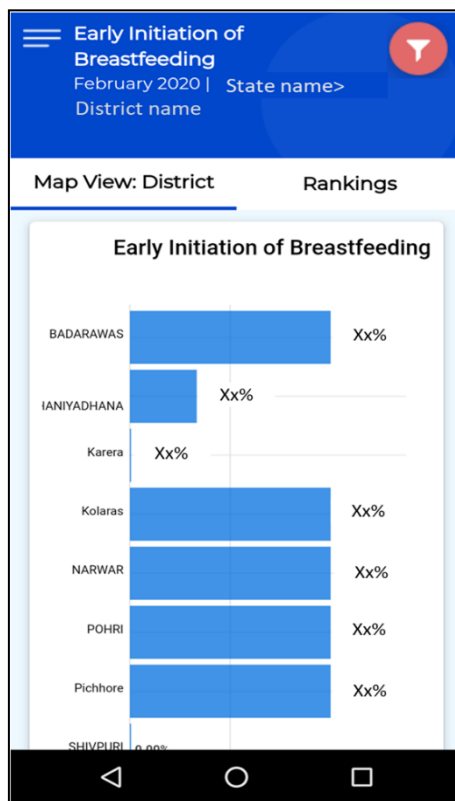

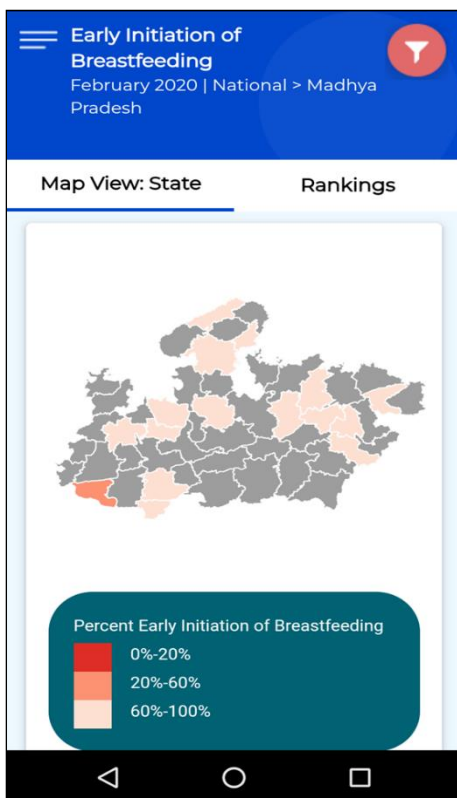

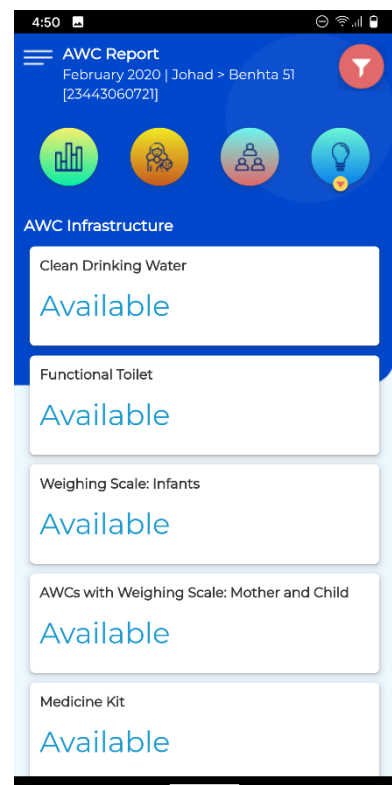

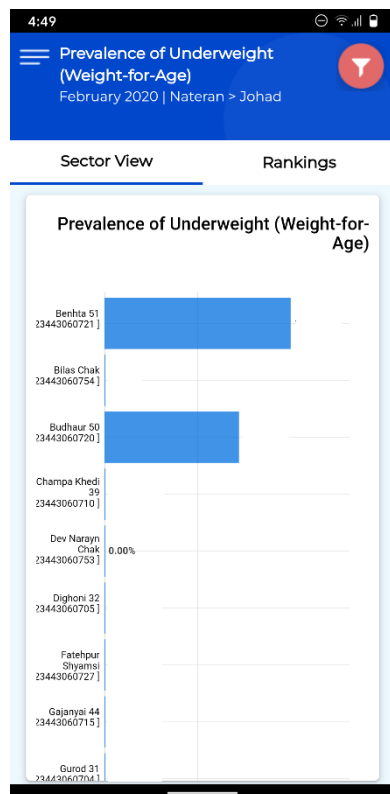

- The user can zoom in and out of the map by pinching in and out on the map.
- To go to back or leave the map/chart view and ranking page, hit on the back button of your phone.
- Click on the bars of the bar chart for district level and below to get indicator information

Blue bar below Map View: National indicates that the “Map view” section is active

Click on “see more” to get detailed information for location below

## Rankings

The user can view the other section, “Rankings” by clicking on it, to the right of map view. The blue bar below *Rankings* indicates that the ranking section for that level is active.

It shows a list of performance-based ranking of states based on the prevalence of a particular indicator, Early initiation of Breastfeeding here, in states.

Rankings are available for all levels till block level

**Note:** This ranking is not meant to draw comparisons between performances in the different locations. However, dashboard users are encouraged to identify issues and improve service delivery in poor performing areas using this data.

*This is a national data view*
